

FreeLeased — Caribbean Leaseholder Platform

Open-source, conviction-capped lease audit · UK + 8 Caribbean jurisdictions

Tagline

"Caribbean residents sign leases they can't read — and lose homes to clauses that were illegal on paper. FreeLeased audits any lease against 25+ statutes across 9 jurisdictions in 30 seconds."

The asymmetry — why this matters

1 : 10 to 1 : 40 cost asymmetry

Freeholder's lawyer sits on a £20k–£200k portfolio retainer; the leaseholder's paralegal costs £500–£5,000 — a 10×–40× cost asymmetry that the rich win by default. FreeLeased collapses the £1,000–£7,000 paralegal dossier to £0–£50 of resident time. Source: project/research/truth-shadow-economy.md §9.1 (heuristic).

WHAT IT IS

- Lease audit engine — deterministic, not generative.
- 4 dossier agents (Resident Status, Tenure+Building, Contracts, Hidden Rights).
- Consensus gate routes divergent verdicts to HITL — never makes the final call.
- Conviction-capped: every claim carries an evidence class (established 0.99 → unfalsifiable 0.33).

HOW IT RUNS

- Local-first via Ollama (src/lib/local-edge-llm.ts) or Giotto flat-rate.
- \$0 compute baseline; no token anxiety; on-prem by default.
- Apache-2.0; multi-tenant schema (23 models, 22 tenantId-covered).
- 5 locale bundles (en, ht, es, fr-patois, fy).

Strategy / Intent — what we promised

Top-down view · 4-agent pipeline · gauntlet loop · conviction pyramid · jurisdiction spine

1. Architecture swim-lane — 4 agents → consensus → HITL

2. Gauntlet loop — 5 sub-loops

reconcile-docs: 10/10 PASS · 0 drift

scripts/reconcile-docs.ts cross-references every claim in project/strategy/* against the public repository.

All numbers in this PDF reconcile to a file path in the repo.

Reconciled + Honest Gaps

Top-down vs bottom-up table · 10 gaps with owners · what's closed in the next 4 days

1. Top-down claim vs Bottom-up code reality			
CLAIM	CODE REALITY	STATUS	CONF
25+ statutes across 9 jurisdictions	src/data/frameworks/ + spine.ts (9 codes)	PASS	established 0.92
159/159 test assertions	scripts/test-suite.ts (159 assertions)	PASS	established 0.99
4 dossier agents · consensus gate · HITL	src/lib/engines.ts + consensus.ts + signing.ts	PASS	established 0.95
5 sub-loops, self-improving overnight	project/strategy/gauntlet-loop.md ↔ learning.ts	PASS	heuristic 0.75
Cost asymmetry 1:10–1:40	research/truth-shadow-economy.md §9.1	PASS*	heuristic 0.75 (Tier 2 ranges)
Multi-tenant · 23 models · 22 tenantId	prisma/schema.prisma + migrate-multi-tenant.ts	PASS	established 0.95

2. Ten honest gaps — not fakeable			
#	GAP	OWNER	UNBLOCK
X1	First real pilot user (≥30 min on app)	Sam + outreach	Within 7 days if any MoU reply arrives
X2	First paying customer	Sam + sales call	14 days from first MoU reply
X3	GitHub stars/forks/watchers	PAT scope fix	Tonight (origin currently private)
X4	Verified live demo URL (curl)	Sam · 5 min	Tonight (private Shogo tunnel)
X5	Demo video recorded	Sam on camera	60 min after X4 verified
X6	Public screenshots of running app	Sam + static deploy	Tonight after docs-site deploy
X7	Signed LOI from any Caribbean agency	Sam · reply + LOI	7 days after follow-ups sent
X8	Press coverage	Needs X1 outcome	30+ days
X9	Pre-seed wire in	Sam · 1 of 5 intros	14–30 days
X10	First B2B institutional deal	Procurement cycle	60 days

3. What's CLOSED in the next 4 days	
- Verify live demo URL (X4) — curl test tonight. - Send 3 social posts tonight + 7 Caribbean MoU emails tomorrow. - Static-deploy docs-site/ → docs-site URL goes from local to public. - Reconcile-docs stays at 10/10 PASS · 0 drift (run before each batch).
